Living and Sustainability: An Environmental Critique of Design and Building Practices، Locally and Globally

9th to 10th February 2017

LONDON، United Kindgom

Hosted in London، UK this international and interdisciplinary conference is open to engineers، architects، planners، building technologists، environmentalists and others interested in environmental and social sustainability. The conference seeks to share knowledge on various issues، such as: advances in the retrofitting of houses، new ideas for environmentally efficient buildings، and the latest developments in Zero Carbon construction from across the world.

It is organized by London South Bank University and AMPS.
