FEATURED THEME
"Design as Collective Intelligence"
Design is our collective intelligence. It shapes the world we live in. We can recognize design in the materiality of our objects، the environments we dwell in، and the visual communication that we share. Design is the common ground of everyday life، and becomes the layer connecting the way we perceive our world، cultures and societies. More on this theme at:

We hope you will be able to join us in Vancouver for this important discussion، and we look forward to receiving your proposal!
