

NUMAN 2014 International Conference on Numerical Analysis
Recent Approaches to Numerical Analysis: Theory, Methods and Applications

September 2–5, 2014, Old Venetian Harbor, Chania, Greece

Conference themes are in the broad area of numerical analysis and applications, including

- numerical methods, algorithms and software
- numerical and scientific computing
- methods and modelling in Science & Engineering
- high performance computing

All areas of numerical analysis are considered, including

- numerical linear algebra
- numerical solution of ordinary, partial and stochastic differential equations
- numerical solution of integral equations
- nonlinear and optimization problems
