

Join us in peaceful Hiroshima, Japan for the Second Asian Symposium on Water, Sanitation and Hygiene held at the lovely Mitsui Garden Hotel from March 29–31, 2015! Registration includes a welcome reception, lunch and a sponsored trip to the UNESCO world heritage site of Miyajima (shrine island), which is one of the three views of Japan.

Asia WASH is a three–day international, peer–reviewed symposium that will provide an interdisciplinary platform for academics, researchers, policy makers, students and professionals. With the theme 'Unity in Community' it is hoped that today's water crisis can be met with viable global solutions.
