TOPICS

Abstracts of research papers in 150–200 words are invited from IT personnel، software designers،
executives، supervisors، managers، administrators،educators and Ph.D. scholars/Post Graduate students
on contemporary issues in Information and Network security befitting any of the conference tracks
mentioned below. Topics of interest for submissions include، but are not limited to:

– Security of Web–based applications and services
– Anti–malware techniques: detection، analysis، and prevention
– Intrusion prevention، detection، and response
– Security for electronic voting
– Combating cyber–crime: anti–phishing، anti–spam، anti–fraud techniques
– Privacy and anonymity technologies
– Network perimeter controls: firewalls، packet filters، and application gateways
– Security for emerging technologies: sensor networks، wireless/mobile (and ad hoc) networks، and
personal communication systems
– Security for Vehicular Ad–hoc Networks (VANETs)
– Security for peer–to–peer and overlay network systems
– Security for electronic commerce: e.g.، payment، barter، EDI، notarization، time–stamping،
endorsement، and licensing
– Implementation، deployment and management of network security policies
– Intellectual property protection: protocols، implementations، metering، watermarking، digital rights
management
– Integrating security services with system and application security facilities and protocols

– Public key infrastructures، key management، certification، and revocation
– Special problems and case studies: e.g.، trade‑offs between security and efficiency، usability، reliability and cost
– Security for collaborative applications: teleconferencing and video‑conferencing
– Software hardening: e.g.، detecting and defending against software bugs (overflows، etc.)
– Security for large‑scale systems and critical infrastructures
– Integrating security in Internet protocols: routing، naming، network management
