

CONSTENG '15 / Civil and Construction Engineering and Technologies Conference
CONSTENG '15 / Civil and Construction Engineering and Technologies Conference will take place on
3-5 December in 2015. The conference will be coordinated by DAKAM (Eastern Mediterranean
Academic Research Center) and organized by B?LSAS (Science, Art, Sport Productions).
<http://www.constengconference.org/>

CONSTENG '15 invites scholars and representatives from different companies to present their recent
research and business experience on construction studies. CONSTENG '15 will focus on structural
engineering and management issues on a global marketplace. Dynamic discussions will explore the
changes shaping the profession today and in the future.
The main questions will be how technology is spurring innovation and accelerating productivity, how
global capital is impacting infrastructure construction, and how the scientific research affects the
construction practices. The contemporary world of construction requires civil engineers with enhanced
skill sets to interact with multi national teams spanning cultural boundaries.

AWARDS

The Best Papers will be awarded during the conference. The Best Paper Award will be announced at the
closing session of the conferences. The award will be decided by the participants' votes only. All papers
presented at the conferences will be nominated automatically and voting will take place just before the
closing session.

The results will be announced from the official conference site and a voucher for a free registration in
one of the next year's events organised by DAKAM will be given to the author.

PUBLICATION

All submitted papers are subject to double blind peer review. Conference proceedings are going to be
available on DVD and DAKAM's digital library with an ISBN number before the conference and will be
sent to be reviewed for inclusion in the "Thomson & Reuters Web of Science's Conference Proceedings
Citation Index" (CPCI) and Google Scholars.

VENUE

The Chamber of Architects of Turkey (CAT) Istanbul Branch Y?ld?z Karakol Building

The Chamber of Architects of Turkey (CAT) is a Constitutional professional organization entrusted with

the formulation of rules and regulations pertaining to architectural practice while seeking public interest and the benefit of the society in general. CAT, as a professional organization in the service of the society, while protecting the rights of architects, also works towards achieving a healthy living environment for that society. This term, our work is carried out with the same concept.
