

5th International conference on the elderly and new technologies
May 17th, 18th and 19th 2017
Castellon, Spain
<http://mayores-nt.uji.es>

We aim to collect and present the latest innovation and projects related to senior citizens and new technologies in following topics:

– Technology for the people.

Devices, programs and services that facilitate the improvement of the health and autonomy. Technological advances related with health and the people. Physical and mental health facilitated by the technology. Biotechnology, social context, ethical aspects.

– World Information Society Day (May 17th).

Digital adoption and digital inclusion, use of information and communication technologies. Social context of the technologies and the elderly. Integration and participation of the senior citizens through technology.

– Computer enhanced education.

Educational gerontology, andragogy. Educational technology (tools) and learning through technology (models and pedagogies). On-line learning, virtual learning.

Proceedings will be published in on-line Ariane journal (ISSN 2340-7719).
