

INTERNATIONAL CONFERENCE ON ADVANCES IN SUSTAINABILITY OF MATERIALS AND ENVIRONMENT

KANYAKUMARI DISTRICT, India

"International conference on advances in sustainability of materials and environment (ICASME'14) aims to provide a platform for academic, researchers, scientists and industry experts to exchange and disseminate the ideas about the latest advances in science and technology. The conference focus on the interaction between the theory, implementation, and research applications. Also, it will lead to collaborative R and D works and new project proposals with the end results of sharing knowledge among researchers and faculty members".

There will be invited talks on the conference days by eminent research scientists and professors from reputed institution from India and abroad. The researchers, academicians, industrialists and PG students are requested to participate and present their research findings. Original research and review papers are invited in the technical themes as well as relevant to the theme of the conference from academicians, researchers, PG students and industrialists. The conference will bring together the leading researchers, engineers and scientists by providing them an opportunity for interactions and discussions on the latest advances in science and technology. Papers should be submitted in IEEE format.

Papers on Material Science and Corrosion should be both in IEEE and "Journal of Advances in Materials and Corrosion" formats.

Organized by
Department of chemistry and civil Engineering
St. Xavier's Catholic College of Engineering
