

Ajman 4th International Environment Conference 2016: Smart Cities and Green Innovation
2nd to 3rd March 2016
Ajman, United Arab Emirates

The Ajman 4th International Environment Conference will focus on how communities and businesses implement innovative green practices toward the realization of a sustainable future. In its fourth year, scientists, experts, and decision makers will convene again to focus on shifting the paradigm on sustainability so that it is viewed as a value-adding framework in technology and business. Processes for innovation will be explored with a focus on customizing green practices to the unique environment of Ajman, the UAE, GCC countries, and the Middle East.

The conference features engaging breakout sessions that will reignite passion for innovation and showcase the practices that are being implemented across the business and technology space. The trade fair is an excellent opportunity to connect with colleagues and exchange ideas, gaining valuable expertise needed to contribute to decision-making on implementation of green practices, using eco-efficient technology, managing the carbon footprint, and supporting the expansion of environmentally friendly initiatives.

Funding Opportunities:

Authors of top 20 research papers selected by the scientific committee will receive the following sponsorship:

- Conference fees waived (including all benefits of registered participants)
- Guaranteed free publication in indexed international peer reviewed journals
 - Hotel accommodation
 - Airport transportation
 - Transportation to and from the conference venue
- Free UAE entry visa if applicable (subject to UAE authorities' approval)
