A COLLECTION OF JOURNALS

The International Journal of Interdisciplinary Global Studies investigates the dynamics of globalization and the transformation of the local. Intellectually, the conference and the journal take three steps: the first is a "this-worldly" step, mapping the details and extrapolating to big picture analyses in order to interpret what is at times challenging, dangerous, and excitingly positive about the "New Globalization." The second step is to set this New Globalization in the context of earlier globalizations – what are the continuities, and what is genuinely new? The third step is to re-examine and redefine the very concept of globalization – in theoretical, anthropological, and philosophical terms. The journal works between the most fastidiously empirical and profoundly generalizing modes of engagement with one of the central phenomena of our contemporary existence.
