

The Eleventh International Conference on the Constructed Environment -- a conference organized by the Constructed Environment Research Network and the University of Calgary, Canada.

A BLENDED CONFERENCE

To support the range of options, and flexibility needed in our current climate, we will offer a blended conference experience. You do not need to commit either to a place-based or virtual presentation at the time of submission. You can present both ways or change your mode of the presentation if your preferences change. The choice to participate virtually could also be a moral decision – for the planet, for security, or when the financial burden of travel is too great. We seek to foster spaces that align with principles of social justice and community development -- particularly in difficult times.

<https://constructedenvironment.com/2021-conference>

Place: Online + UBC Calgary, Canada

Format: A mix of live, pre-recorded, and in person (at scale that's allowed) presentations and social interaction spaces.

Dates: 12-14 May 2021

CALL FOR PAPERS

Founded in 2010, the Constructed Environment Research Network is brought together by a common shared interest in human configurations of the environment and the interactions among the constructed, social and natural environments. As a Research Network, we are defined by our scope and concerns and motivated to build strategies for action framed by our shared themes and tensions. We invite proposals addressing one of the following themes or special focus:

Special Focus – "Building the Anthropocene"
Theme One – The Design of Space and Place
Theme Two – Constructing the Environment
Theme Three – Environmental Impacts
Theme Four – Social Impacts
